

LPIE is excited to introduce students to careers in STEM during our speaker series for Celebrating the Sciences month in March. On March 10, Brian Jaquet, one of Roblox's top marketers, will share the history of the game creation platform, and Alex Balfanz, the creator of the popular game, Jailbreak, will discuss the fundamentals of computer science and coding.

If you would like additional information about Roblox and the robust safety controls in place to help parents provide the safest experience for their child, please visit the sites below.
